ABOUT.TXT

Senior SDET · AI-Augmented Quality Engineering

Alexander Turdzeladze

Senior SDET with 8+ years shipping quality at scale in fintech, iGaming and enterprise software. I build Playwright and .NET automation, shift testing left into CI/CD, and use AI agents to speed up test design, triage and release sign-off.

turdzeladze@live.com github.com/askanison linkedin.com/in/turdzeladze

CV PROPERTIES

8+ years in QA

Automation: **Playwright · C# · TypeScript**

Domains: **Fintech · iGaming · Enterprise**

Languages: **Georgian · English · Russian**

Location: **Tbilisi, Georgia**

EXPERIENCE

Senior SDET · Payments & AML

eToro · Feb 2024 – Now

Fintech · Money Operations: payments, AML & fraud

- Own API automation for 30+ AML, fraud and compliance rules in C#/.NET 8, from rule logic to alert routing and case creation.
- Automated deposits, withdrawals, FX and customer notifications across card, wire, e-wallet and SEPA, from PRD to signed-off release.
- Built Claude Code agent skills and multi-agent QA workflows that take a feature from PRD to test matrix to Jira/Xray sign-off.

Tools: C# · .NET 8 · NUnit · Splunk · Jira · Xray · Claude Code

Senior SDET · ex-QA Chapter Lead

Adjarabet (Flutter) · Apr 2021 – Now

Tbilisi · iGaming · Georgia & Armenia

- Led the automation chapter and mentored manual QA into automation, moving the suite from SpecFlow to NUnit to TypeScript + Playwright.
- Own Playwright E2E for the Armenian market: registration, deposits and promotions, with page objects, fixtures and TestRail links.
- Built flaky-test intelligence and a Playwright report manager that compare nightly runs, so recurring failures get fixed, not retried.

Tools: TypeScript · Playwright · GitHub Actions · TestRail

Test Automation Engineer · SDET

Envita Solutions · Nov 2021 – Feb 2024

Remote, US · Enterprise sustainability SaaS

- Built a C#, Selenium and NUnit automation framework from scratch for waste-management and sustainability software.
- Automated the manual regression for platforms that manage a network of 3,000+ supplier partners.
- Wired test results into reporting, giving the team clear visibility of release health.

Tools: C# · Selenium · NUnit

QA Automation Consultant

Healthee · Nov 2022 – Jan 2023

Remote, Israel · HealthTech

- Wrote Playwright E2E tests and ran story testing across the SDLC for a health-benefits platform.

Tools: Playwright

QA Lead

Sweeft Digital · Aug 2021 – Dec 2021

Tbilisi · Software services

- Mentored junior QA engineers and tested e-commerce, e-wallet and KYC products.

Test Automation Engineer

Adjarabet · Feb 2019 – Apr 2021

Tbilisi · iGaming

- Built UI and API tests in C# and Selenium for web and mobile gaming products.
- Tested the peer-to-peer gaming platforms end to end through their market launch.

Tools: C# · Selenium

Software QA Engineer

Nexus Group · May 2018 – Jan 2019

Tbilisi · iGaming

- Tested platform features, casino promotions and game integrations, and investigated customer-reported issues.

Customer Support Agent

Nexus Group · Jun 2017 – May 2018

Tbilisi · iGaming

- Gave players technical and account support by live chat and email.

This CV: site & test suite

Personal project · Nov 2026

cv.askanison.de · Astro · GitHub Pages

- Built this desktop-style CV in Astro, with a Playwright suite that runs at desktop and phone sizes in GitHub Actions.
- Tests cover keyboard use, axe accessibility (WCAG 2.1 AA), print, games and visual regression, all from stable test IDs.
- Mutation-tested the suite: broke the site on purpose dozens of ways and tightened any test that didn't fail.

Tools: Astro · Playwright · axe-core · GitHub Actions · Docker

Side projects

Independent · Ongoing

- Designing a QA automation course that takes manual testers to .NET + Selenium and TypeScript + Playwright.
- Building an AI Scrum Master agent on the Claude API with Jira integration to automate team ceremonies.
- Built API access to a multi-port GSM/LTE gateway for reliable SMS logging and automated retrieval.

Tools: Claude API · Jira API

SKILLS

Test automation

Playwright ·
Selenium WebDriver & Grid · NUnit ·
MSTest · SpecFlow (BDD) ·
Page objects & fixtures · Data-driven tests

Languages

C# · **TypeScript** · JavaScript · SQL ·
PowerShell & Bash

AI-augmented QA

AI agents for QA (Claude Code) ·
Multi-agent workflows · Prompt engineering ·
Claude API

Leadership

QA chapter leadership ·
Mentoring & upskilling QA ·
Test framework architecture ·
Stack migrations to Playwright

Domain expertise

Payments & money movement ·
AML, fraud & compliance rules ·
Regulated fintech ·
iGaming (casino & sportsbook) ·
Enterprise SaaS

API & services

REST APIs · Postman · Swagger / OpenAPI ·
.NET 8 & ASP.NET Core · Azure Service Bus

CI/CD & cloud

GitHub Actions · Jenkins · TeamCity ·
GitLab · Docker · AWS · Azure

Quality engineering

Test strategy & planning · Risk-based testing ·
Exploratory testing · Flaky-test triage & RCA ·
Accessibility (axe, WCAG) · Visual regression ·
Mutation testing · Release sign-off

Data & observability
SQL Server · MySQL · Oracle · MongoDB · Splunk · Coralogix

Test management
Jira · Xray · TestRail

TRAINING

2011 – 2013

MS, Energy Management & System Technology

Georgian Technical University · Tbilisi

2006 – 2010

BS, Information Technologies

Georgian Technical University · Tbilisi
